## EXPERIENCE

### RecoveryTrek, Norfolk — Mobile Developer

September 2020 - Present

Leading in IOS and Android development for the IT team. Most duties often involve software development life cycle, software design, programming, test automation.

- Daily communication and teamwork between the IT team and customer support team to develop new features and troubleshoot issues.
- Using Java, Kotlin, and XML for Android Development; using Swift for IOS development; and using Apex for back-end web development.
- Implement multiple APIs: Representational State Transfer (REST), Camera, Location, Bluetooth, Storage, Permission Handler, Barcode, Breathalyzer Device, Audio Player, Salesforces, AWS, and Bugfender SDK.
- Link to products: [PROOF android](#), [PROOF ios](#), [MobileTrek android](#), [MobileTrek ios](#).

### Cal State University Fullerton, Fullerton — Mobile Developer

August 2019 - August 2020

Leading team in IOS and Android development which was designed by Computer Science and Health and Human of CSUF. The app is used to help post-pregnant women keep track of their weight and emotion to bring them back to pre-pregnancy life.

- Using Git, Flutter and Firestore (NoSQL) engineering to build the project.
- Apply Agile Methodologies and Analytical Skills to develop application features.
- Using JavaScript to write the back end on Firebase Functions.
- Implement multiple APIs: Motion Sensor, Webview, Multi Languages, Authentication, Google Map, Firebase.
- Link to products: [Dump The Bump android](#), [Dump The Bump ios](#).
