WORK EXPERIENCE

Research Assistant

Intelligent Learning Experience Lab

08/2019 – Present | Fullerton, California

The Intelligent Learning Experience Lab is a sub-organization of the Computer Science Department at California State University Fullerton focuses on research that leverages technology to improve the learning experience.

Achievements/Tasks

- Collaborating with a team of the Computer Science and Health and Human Development Department of CSUF to produce a native mobile application that helps post-pregnant women keep track of their weight to bring them back to pre-pregnancy weight.
- Develop and enhance the application for front end and back end using Flutter and Firebase; troubleshoot and debug issues to optimize performance, as well as design UI to improve user experience.

Information Technology Specialist

National Resource Center For Asian Languages

08/2019 – 01/2020 | Fullerton, California

Achievements/Tasks

- Installed and Maintained hardware and software components on computer stations and IT equipment.
- Troubleshooting in a timely manner to technical issues and problems.
- Developing and maintaining the website and social media.
- Consulted and translated actual databases into new platforms as well as backing up data during the process.
- Support the team in projects and events related by designing event features, figures, and posters.
