EXPERIENCE

RecoveryTrek, Norfolk — *Mobile Developer*

September 2020 - Present

Leading in IOS and Android development for the team. Most duties often involve design, coding, troubleshooting, data manipulation, research, and testing.

- Collaborating daily with both the IT team and customer support team to develop new features and troubleshoot issues.
- Deploy test build to TestFlight for ios and Firebase Distribution for android, as well as deploy production builds to Apple store and Google Play store.
- Implement multiple APIs: Camera, Location, Bluetooth, Storage, Permission Handler, Barcode, Breathalyzer Device, Audio Player, Salesforces JSON API, AWS, and Bugfender SDK.
- Link to products: [PROOF android](#), [PROOF ios](#), [MobileTrek android](#), [MobileTrek ios](#).

Cal State University Fullerton, Fullerton — *Mobile Developer*

August 2019 - August 2020

Leading the team in IOS and Android development which was designed and developed by a Computer Science team and a Health and Human team of CSUF. The app is used to help post-pregnant women keep track of their weight and emotion to bring them back to pre-pregnancy life.

- Using Flutter and Firestore to build the project.
- Create documents, maintain and develop application features.
- Apply both OOP and MVC models to develop the applications.
- Implement multiple APIs: Motion Sensor, Webview, Languages, Authentication, Google Map API, Firebase API.
- Link to products: [Dump The Bump android](#), [Dump The Bump ios](#).
