WORK EXPERIENCE

Research Assistant

Intelligent Learning Experience Lab

08/2019 – Present | Fullerton, California

The Intelligent Learning Experience Lab is a sub organization of the Computer Science Department at California State University Fullerton focuses on research that leverages technology to improve the learning experience.

Achievements/Tasks

- Collaborating with a team of the Computer Science and Health and Human Development Department of CSUF to produce a fully functional native mobile application for the Intelligent Learning Experience Lab (ILXL).
- The application is developed by using Flutter API from Google with Firebase as a database.
- The application helps post-pregnant women keep track of their weight to bring them back to pre-pregnancy weight.
- Writing mostly structure for application, gathering specific requirements and suggest solutions; troubleshoot and debug issues to optimize performance, as well as design interfaces to improve user experience.

Information Technology Support

National Resource Center For Asian Languages

08/2019 – 01/2020 | Fullerton, California

Achievements/Tasks

- Support the team in projects and events related to helping language teachers develop better ways to improve the capacity for the teaching and learning.
- Designing event features, figures, and posters.
- Developing and maintaining the website and social media.
- Troubleshooting in a timely manner to technical issues and problems.
